OUR COMPANY

FoamPRO® Mfg, Inc. was established in 1952 as a manufacturer of foam painting tools, brooms and mops. Our products are now sold nationwide (and internationally) in paint stores, hardware stores and home centers.

A steady flow of new products in recent years has solidified our position as the innovator and leader in the foam painting tool category. Everything we sell is still made in our own factory with the highest quality raw materials and quality-control standards. This ensures timely deliveries of superior quality products on a consistent basis.

As we complete our 70th year in business, we are very proud of the reputation we have earned in the industry. If you are already a customer of ours, we thank you for your support. If you are a potential new customer, we welcome the opportunity to earn your business.

OUR PRODUCTS

Consumer Painting Tools – These value priced products offer many advantages over conventional painting tools.

Professional Painting Tools – Finish Coater and Finest Finish products offer many of the same features and benefits as our consumer products with added resiliency and durability.

SOLVEX Industrial Coating Applicators – Revolutionary new foam is impervious to solvents and harsh chemicals that are commonly used in industrial coatings.

WHY FOAM PAINTING TOOLS?

- They provide excellent paint pickup, paint release and paint coverage.
- Painted surfaces are not spoiled by unsightly fuzz, lint or seam marks.
- Foam conforms to surface irregularities and provides excellent contour coverage. Unlike fabric rollers, foam will not “mat down”.
- Foam has a “reservoir action” and carries most of the paint below the surface in thousands of tiny open cells (not on the surface like most fabric rollers). This means less frequent “dipping” and less “spreading out” of paint.
- Foam cleans quickly and easily, providing economy through repeated use.
- Outstanding results can be achieved with all paints (latex, acrylic, alkyd), stains, primers and clear coatings.
